Yago Mateos

Front End Developer

My name is Yago Mateos, a highly motivated and trained software developer with more than 8 years of experience in web development. My background lies in HTML, CSS and JavaScript and I am proficient in building dynamic and responsive websites. Also, I have more than 2 years of experience working with React, which has allowed me to expand my skills and knowledge in creating web applications and their usability.

Experience

Barcelona
Apr 2022 - Present

React Developer
Wpsfixer

React components development: Creating custom components for the user interface and application logic using the React library and its extensions like React Native, React Router, Redux, etc.
Integration with other front-end and back-end technologies, such as HTML, CSS, JavaScript, databases, APIs, among others.

La Coruña
2022 - Apr 2022

Senior Front End Developer
BySidecar

Development and maintenance of web applications using technologies such as JavaScript, React and Express.
Implementation of relational and non-relational databases (MySQL and MongoDB) to store and manage application data.
Integration of third-party APIs in the application to access data and external functionalities.

Barcelona
Feb 2020 - Mar 2022

Nestlé Web Configurator
Sopra Steria

Troubleshooting and debugging on Nestlé e-commerce stores in Asia using programming languages such as React, JavaScript, HTML and CSS.
Identification and resolution of usability and performance issues in Nestlé online stores, which improved the user experience and increased conversions.

Barcelona
Oct 2019 - Jan 2020

Front End Developer
Tectónica

Design and development of websites using HTML, CSS, PHP and WordPress. Creation and customization of WordPress themes to meet the specific needs and requirements of the client.

I work in an agile environment, collaborating with other developers and designers on multidisciplinary projects.

Barcelona
Jul 2019 - Oct 2019

Front End Developer
InfoJobs

Creating user interfaces using HTML, CSS, and Bootstrap collaborating with back-end developers using .NET to connect databases to the front-end.
Development and maintenance of reusable user interface components to ensure visual consistency on the website.

Barcelona
Feb 2019 - Oct 2019

Front End Developer
Digital Bakers

Development of functional and attractive user interfaces with Drupal and Twig.
I worked with Drupal fields and views to create content and present information effectively to the end customer.

Education

London
Sep 2007 - Jun 2010

BA Honours Digital Media
London University of the Arts
BA Honours Digital Media Design
